

THE ULTIMATE GUIDE TO CHOOSING THE RIGHT CONCRETE FINISH

Consider the Functionality

Evaluate Usage: Determine how the concrete surface will be used. For high-traffic areas like driveways and walkways, choose a finish that provides durability and slip resistance, such as a broom finish or exposed aggregate.

01

Match the Aesthetic

Align with Style: Choose a concrete finish that complements the overall design and aesthetic of your space. A smooth, polished finish works well for modern and minimalist designs, while a stamped finish can mimic the look of natural stone or brick for a more traditional feel.

02

Assess Maintenance Needs

A polished finish is relatively low maintenance and easy to clean, while decorative finishes like stamped or stained concrete may require regular sealing to maintain their appearance and protect against wear.

03

Consider Climate and Weather

Factor in Environment: Your local climate can influence the best choice of concrete finish. In areas with harsh winters or heavy rainfall, consider finishes that provide good traction and durability, like a broom finish or exposed aggregate. In hot climates, lighter-colored finishes can help reduce heat absorption.
